Under the authority of the *Pest Control Products Act*, Health Canada's Pest Management Regulatory Agency (PMRA) has granted conditional registration to technical grade metconazole and the end-use product Caramba Fungicide for use in Canada on cereals, soybeans and sugar beets. The specific uses approved in Canada are detailed on the product label of Caramba Fungicide, *Pest Control Products Act* Registration number 29767.

Corresponding MRLs were proposed in the consultation document published on 8 December 2011, Proposed Maximum Residue Limit PMRL2011-49, *Metconazole*. PMRL2011-49 also proposed to establish an import MRL for metconazole in bananas to permit the import and sale of food containing such residues. The PMRA received no comments in response to this consultation.

To comply with Canada's international trade obligations, consultation on the proposed MRLs was also conducted internationally by notifying the World Trade Organization, as coordinated by the Standards Council of Canada. No comments were received as a result of the World Trade Organization consultation.

The following MRLs for metconazole take legal effect in Canada as of the publication date of this document.

Established Maximum Residue Limits for Metconazole

Common Name	Residue Definition	MRL (ppm)	Food Commodity
Metconazole	5-[(4-chlorophenyl)methyl]-2,2-dimethyl-1-(1*H*-1,2,4-triazol-1-ylmethyl)cyclopentanol	2.5	Barley
		1.0	Oats
		0.25	Rye
		0.15	Sugar beet roots, wheat
		0.1	Bananas
		0.05	Dry soybeans
		0.04	Eggs; fat, meat and meat byproducts of cattle, goats, hogs, horses and sheep; milk

ppm = parts per million

A complete list of pesticide MRLs established in Canada, as of the date indicated, can be found on the Maximum Residue Limits for Pesticides webpage in the Pesticides and Pest Management section of Health Canada's website.
